

## HOW TO HOST A STATIC WEBPAGE IN S3

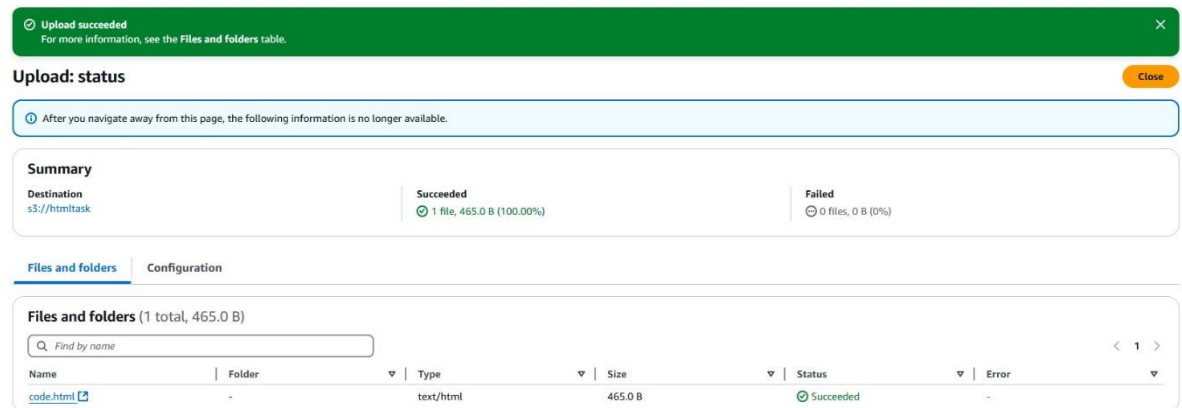

### CREATE AN S3 BUCKET

- Log in to AWS Console and go to S3.
- Click Create bucket.
- Uncheck "Block all public access" (for public websites).
- Click Create bucket.

### UPLOAD YOUR WEBSITE FILES

- Go to the Objects tab.
- Click Upload and add your index.html & Click Upload.

### ENABLE STATIC WEBSITE HOSTING

- Go to the Properties tab.
- Select Static website hosting and enable.

#### Static website hosting

Use this bucket to host a website or redirect requests. [Learn more](#)

#### Static website hosting

- ☐ Disable
- ☒ Enable

### MAKE FILES PUBLIC & ACCESS YOUR WEBSITE

- Go to the Permissions tab. Uncheck block public access and ACL enable in object ownership.
- Copy the Bucket URL & Open it in your browser.
